VEHICLE BOAT/PART FILE

A part is defined as any serially numbered component from a vehicle or boat, and ownership documentation for a vehicle or boat.

Any component containing a serial number that has been stolen from a vehicle or boat may be entered into the LEADS and NCIC Vehicle/Boat Part File.

SYSTEM FUNCTIONS

The accuracy of records is an integral part of the system; therefore; all records must be double-checked by a second party. Additionally, the records must be queried for accuracy after any submissions to the system.

When an entry is made for a non-entering agency, the ORI of the non-entering agency must be placed in the MIS field of the record. Do not enter a non-entering agency ORI in the ORI field.

Refer to the NCIC Manual (Vehicle/Boat Part) for additional system functions and information.
